How to display English subtitles in Youtube movie

1. Move cursor to the control panel, click "Subtitles" to open the subtitle display mode (default is Japanese).

2. Click "Settings" then select "Subtitles/CC(1) Japanese".

3. Change the check to "Auto-translate", then selecting "English" (or other language) from a long list of languages.
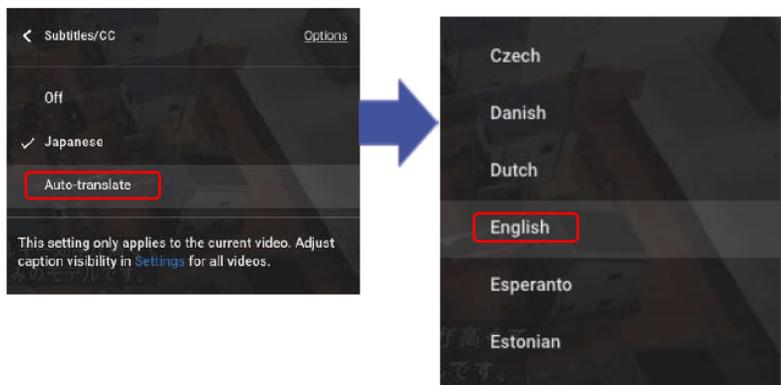

4. The automatically translated English (or other language as selected in previous step) based on the Japanese subtitles will be displayed (100% accuracy can not be guaranteed though).
